PROFILE

Artificial Intelligence and Data Science student at KPR Institute of Engineering and Technology with strong interest in Data Science and Machine Learning. Skilled in data analysis, problem-solving, and developing automation and data extraction tools. Seeking opportunities to apply analytical and technical skills to real-world data-driven solutions.

EXPERIENCE

Full Stack Intern – Yaane Technologies

Dec 2025 – Jan 2026

Projects Done

Notification Rule Builder

- Developed a rule-based notification system enabling users to create and manage custom alert rules.
- Implemented conditional logic and event-based triggers to automate notification generation.
- Built scalable backend logic using Python, REST APIs, and database integration to improve monitoring efficiency.

Reddit Web Scrapping Tool

- Built an automated web scraping tool to collect posts, comments, and trending data from Reddit.
- Implemented data extraction and parsing to structure large volumes of social media data.
- Enabled automated data collection for trend analysis and sentiment insights using Python and APIs.

Research and Development Intern – Book My Wenue

Mar 2026 – Present

- Performed data collection, data cleaning, and data preprocessing to prepare raw datasets for analysis and machine learning tasks during internship at Book My Wenue

PROJECTS:

Idea To Startup Feasibility Predictor

- An AI-powered platform that validates business concepts using API-driven Large Language Models. By analyzing a Startup Title, Target Users, and Problem Statement—either via text input or by analyzing uploaded documents containing idea details—the system calculates an objective Feasibility Score and provides instant, data-driven market insights. We have Deployed in the Vercel and Render
- Deployed URL : <https://idea-to-startup.vercel.app>

AI Rockfall Prediction

- Uses machine learning to identify areas with high rockfall risk. Analyzes terrain, slope, and environmental data for accurate predictions. Helps improve safety and early hazard detection in vulnerable regions.
- Technologies used : Scikit-learn, Python Streamlit, LSTM Based Machine learning Model

CERTIFICATIONS

- Data Analysis With MS Excel – Great Learning
- Exploratory Data Analysis – Great Learning
- Completion of Full Stack Intern – Yaane Technologies
- NPTEL Certification – Responsible & Safe AI System

EDUCATION

KPR Institute of Engineering and Technology

Bachelor of Technology

- CGPA: 8.23

2024 – 2028

SSLC Percentage : 81%

HSC Percentage : 80.2%

POSITIONS OF RESPONSIBILITY

- Event Coordinator – Yuva Club
- IEEE IT SOCIETY – Design Lead

SKILLS

Programming Languages : Python, C, Java

Database: MongoDB, MySQL, PostgreSQL

Deployment: Vercel, Render, Railway, Netlify, Zeabur

Backend : Python Flask, Node JS, FastApi

ML Algorithms : Linear Regression, Logistic Regression, SVM, K- Nearest Neighbors, LSTM Based Machine learning model
